

RW-BW520

AC RW-BW520 is a big size Enterprise Gateway based on X86 protocol. Support Load Balance, Ethernet backup and Ethernet Superimposed, multi-ISP access; then support DHCP, policy routing and VPN, together with Smart flow control, Abundant security, varied user management and multiple authentication function, it consistent to provide high efficiency and professional network connectivity for hotel, school, hospital, shopping mall. What's more, it can manage the wireless access point fast and stable in central and remote, provide whole wireless coverage solution, cost saved and convenient.

Features:

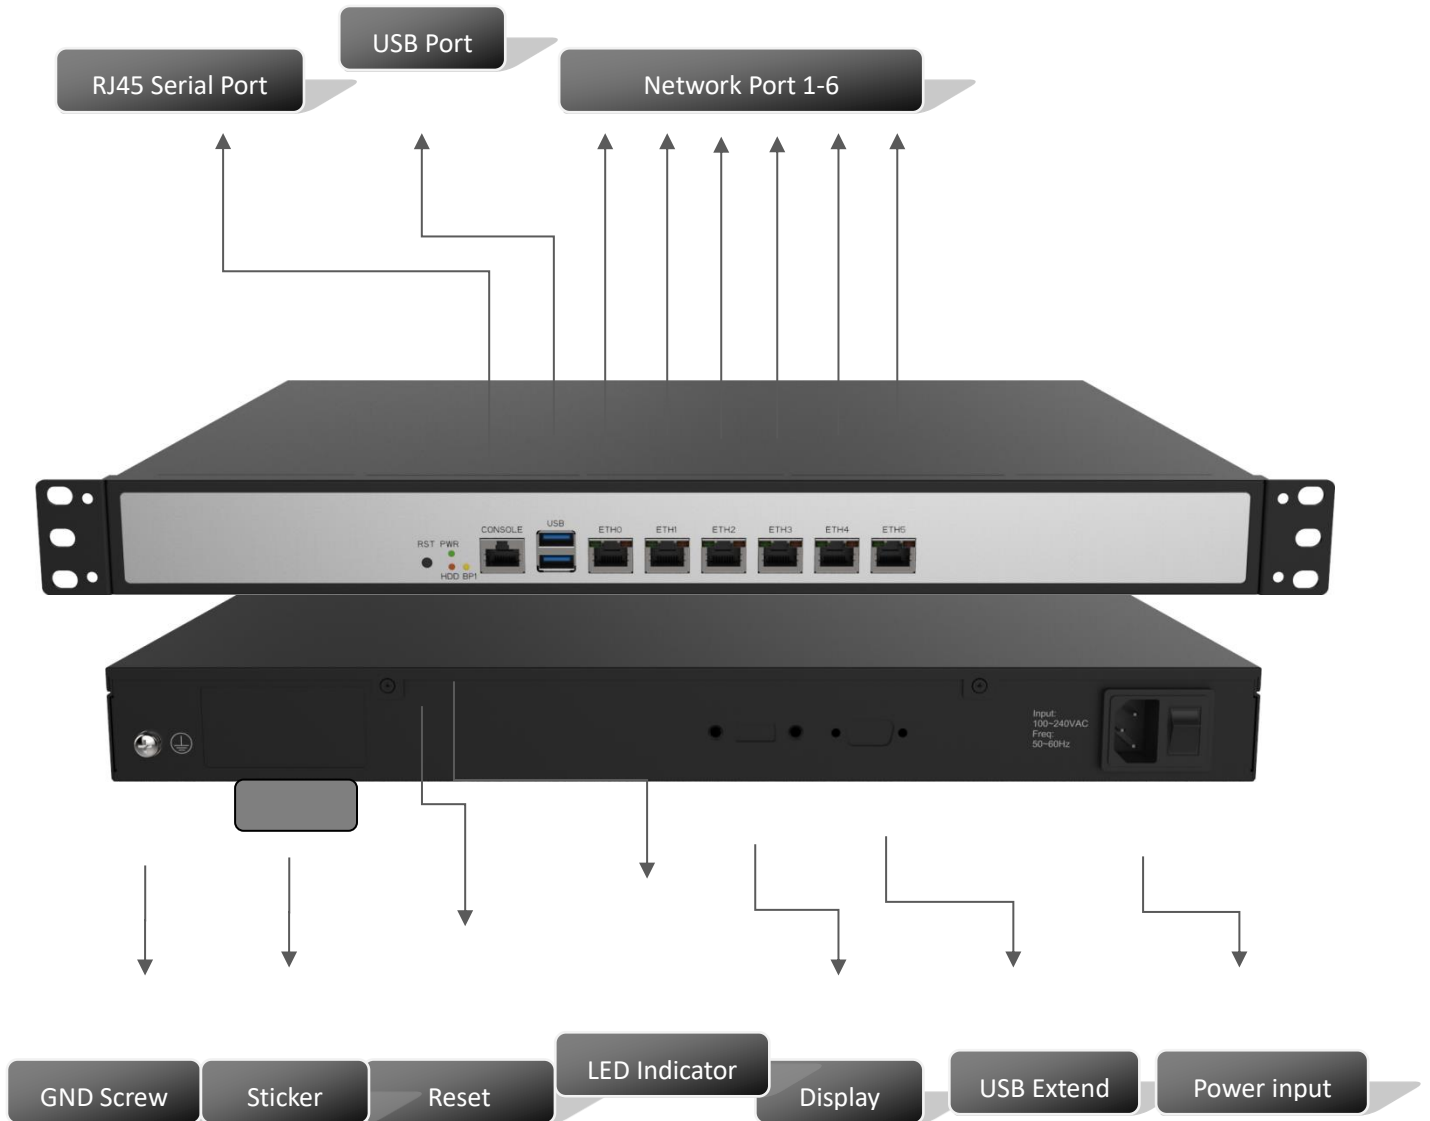

- Max to access and manage 512 users
- Max to manage 512 PCS wireless AP
- Centrally and remotely to manage/configure wireless AP
- smart QoS
- Abundant security mechanism
- Group or Single Configure
- Multiple authentication
- 1U frame , Intel® Baytrail™J1800 dual core 2.41GHz low power CPU
- 6*Intel® I211AT Gigabit RJ45 ports
- Build-in 75W-100W Industrial use power supply
- Support 1-8GB flash, DDRIII 1333/1600
- Support multiple storage like hard disk, SSD, CF card, DOM
- Appearance is exquisite, not easy to scratch and leave fingerprints

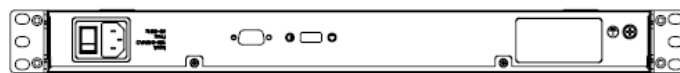

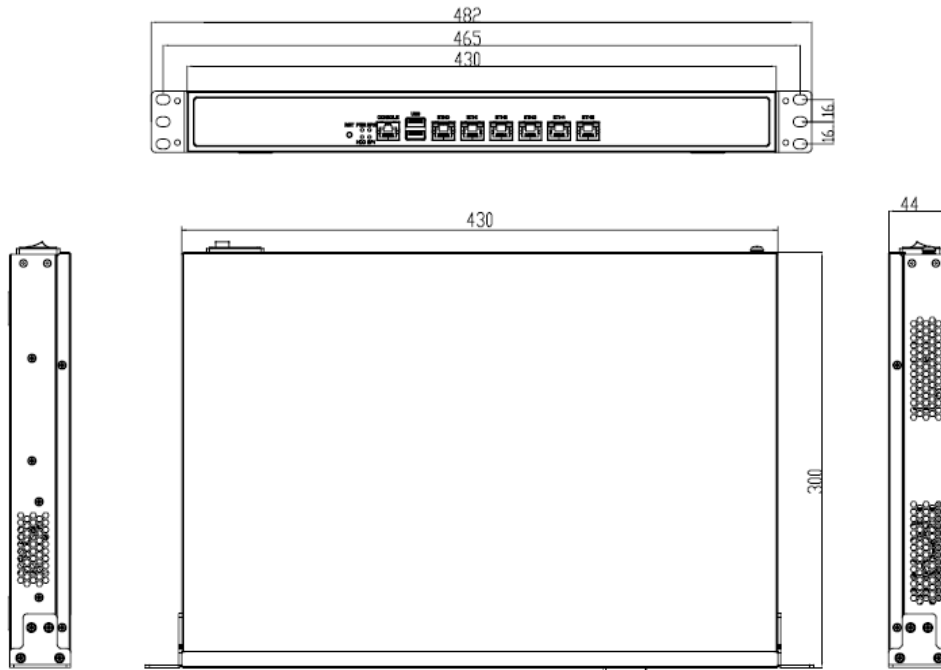

www.radwave.co

Storage		Platform	
Storage type	General hard disk, SSD, CF Card, DOM	Size	1U Frame
Hard disk	1 x SATAIII 2.5 inch hard disk, capacity optional	CPU	Intel® Baytrail J1800 2.4GHz/1MB
SSD	1 x M-SATA SSD, default: 8GB	CPU type	Board sticking
CF card	1 x TYPEII CF card	Chipset	SOC
DOM	1 x SATA DOM (share hard disk interface)	BIOS	SPI AMI EFI BIOS
Extend Port		Flash Info	
PCIe	No	Flash	DDR3 1333/1600
Mini-PCIe	No	Flash size	Default: 2GB, Optional: 4~8GB
Others		Network Interface	
Watchdog	Support	Interface	6 x GbE RJ45 Ports
GPIO	6 lines	Chipset	6 x Intel®I211AT
Heat Dissipate	No Fan module on mother board 1 x System Fan	BYPASS	1 group is optional
Power Supply		Bypass Control	MCU or GPIO control
Power supply	Build in Open type power supply	Serial Port	
Power Consumption	75W	Port	1 x RJ45 Serial port
Power input	AC 90V-264V @47-63Hz	Default baud rate	115200bps
Size, Environment and Certification		Serial port definition	Compatible with Cisco definition
Size	430 (L)×300(W)×44(H)mm	I/O Interface	
Package Size	545(L)*415(W)*180(H)mm	Reset Button	1PC, to control GPIO or BYPASS
N.W	KG	LED Indicator	1 x Power Indicator (Green) 1 x Status Indicator (Orange) 2 x Bypass Indicator (Yellow)
G.W	KG	Power Switch	1 x Power Switch
Working Temperature	0°C-50°C	USB Port	2 x USB2.0 Port
Storage Temperature	-40°C~70°C	Display port	1 x VGA Port (Optional)
Storage Humidity	5~95% RH, Non condensing	Power Injector	1 x AC Power injector
Certification	3C, ROHS

Product Size:

Firmware Features:

AC RW-BW520 is a big size Enterprise Gateway based on X86 protocol. Support Load Balance, Ethernet backup and Ethernet Superimposed, multi-ISP access; then support DHCP, policy routing and VPN, together with Smart flow control, Abundant security, varied user management and multiple authentication function, it consistent to provide high efficiency and professional network connectivity for hotel, school, hospital, shopping mall. What's more, it can manage the wireless access point fast and stable in central and remote, provide whole wireless coverage solution, cost saved and convenient.

A. Multiple Gigabit WAN and multiple routing functions

AC RW-BW520 support PPPoE/DHCP/Static IP access, work with different ISP and max 512 end users can access into it.

Support multiple Gigabit WAN ports, support load balance, Ethernet Superimposed and multiple ISP network access to avoid bandwidth overload, then support Ethernet backup to recover the dropped networking line, ensure the whole networking smoothly;

It support policy-based routing function also, administrator will set the network based on IP/MAC/Domain/Interface policies.

B. Smart QoS

AC RW-BW520 support smart QoS based on ports, individual users, user groups and user applications. Allow bandwidth reservation and dispatch by tunnel or by application.

It provide a variety of functions including multiple queuing mechanisms (priority queuing, low latency queuing, custom queuing, weighted queuing), congestion avoidance, traffic policing, traffic shaping and priority marking, ensuring different service for different users and applications.

C. Abundant security mechanism

AC RW-BW520 support a variety of security mechanism, like TCP/UDP/ICMP Flooding, IP/MAC/URL/Web filtering functions, Ping of Death and other related threats, extend protection to every port of the router and enable the ports to provide DoS/DDoS attack protection, traffic monitoring, Uniform Resource Locator (URL) filtering, and application layer filtering.

What's more, it support user management and password protection. Users of different levels are assigned with different configuration authorities.

D. Multiple authentication

AC RW-BW520 support portal authentication, PPPoE authentication and Radius authentication

It support Wechat authentication, one-time password authentication, display or promote advertisement to user and bring extra value for merchant; Then support SMS authentication when access into cloud server and work with SMS gateway.

Then it can work with the 3rd party radius server for advertisement and billing functions.

What's more, it work as PPPoE server, can create PPPoE account, password, bandwidth and valid time, to realize PPPoE billing function.

E. Remote Maintenance, Auto firmware upgrade

Administrator can access into AC RW-BW520's management interface page remotely at home, to manage and maintenance the wireless access point, keep the whole network stable in economic way.

AC RW-BW520 can automatically to upgrade the new released firmware, zero steps to recovery the system problem.

F. Others

AC RW-BW520 support WAN port VLAN, VPN dial up, DNS Proxy, IP address translation, user behavior management, make it more professional in Enterprise.

F. AC management for wireless AP

Assign IP address for Wireless AP: Build in DHCP Server, it can assign the IP address for wireless AP automatically when AP online.

Group or Single Configure: AC RW-BW520 auto detect the wireless AP, support group or single configuration, central to manage the SSID password, mode, channel, RF power, coverage threshold; Then reboot, reset or upgrade firmware remotely to complete the maintenance.

Firmware Spec:	
AP Management	Max to access and manage 512 users
	Max to manage 512 PCS wireless AP
	Centrally and remotely to manage/configure wireless AP
	View user's status
Smart Flow Control	One click smart flow control
	Powerful multiline diversion
	Application Priority Automatically
Load Balance	Multiple WAN, multiple ISP network access
	Intelligence load balance
	Ethernet line backup
	Ethernet Superimposed
	Policy routing: based on IP address, destination IP address, source MAC address, network port, domain, destination port, Extranet port, Identity binding
	Protocol binding
Routing	Static Routing
Behavior Management	All-round to block P2P firmware
	P2P flow control and bandwidth allot
	File and URL filter
	Monitor network behavior at all times
Bandwidth limitation	IP-based bandwidth limitation
	Safeguard / Restrict bandwidth
	Time strategy
	IP based session restriction

www.radwave.co

Security Center	MAC address filter
	UPR/key words filter
	Web content filter
	IP address filter
	Port mapping
	DMZ
Defense Center	TCP/UDP/ICMP flood defense
	Block TCP scanning
	Block ping WAN port
ARP Detection	Send GARP packets
	ARP Scanning on WAN/LAN port
	Online detection
	IP-MAC binding
Authentication	PPPoE authentication
	Portal authentication like Wechat Authentication, WEB password authentication, One-time password authentication, SMS authentication
	Radius authentication: work with the 3rd party radius server
Management	Web/CLI/Telnet management
	Remote management
Others	DDNS, VPN management
Content	AC RW-BW520 *1
	Power Cable *1
	Installation Accessory
	QIG*1
